The district's new Celeste Community Learning Center will be available for evening research and course completion.

Celeste Creative Choice is a new flexible educational setting for students seeking to replace the traditional program with one that embraces new 21st century learning experiences. Students can complete their high school education using virtual courses and online curriculum any time, any where. Whether at home, the district's new Celeste Community Learning Center, or out and about, students will have access to the district's educational resources and curriculum. Each student will be provided a digital locker where data pertaining to course assignments and activities are stored. Through this portal, students can create documents using the district's software such as Microsoft Word, Excel, PowerPoint and many other hosted applications.

Celeste Creative Choice gives students the opportunity to combine their virtual schooling with enrichment courses offered by the district's highly qualified staff in the areas Technology, Art, Spanish, and Vocational Education. Each student can customize their personal educational plan (PEP) giving the learner independence, responsibility and creativity in their education.

*“if we teach today as we taught yesterday,
we rob our children of tomorrow”*

John Dewey
